# POWER AND FLEXIBILITY

## SPIRAL 20

a single-phase electric brush cleaner for indoor ventilation duct cleaning. Suitable for tubes of 100 to 600 mm both circular and rectangular.

The feature that distinguishes

## SPIRAL 20

is the ability to use different types of rotating cable.

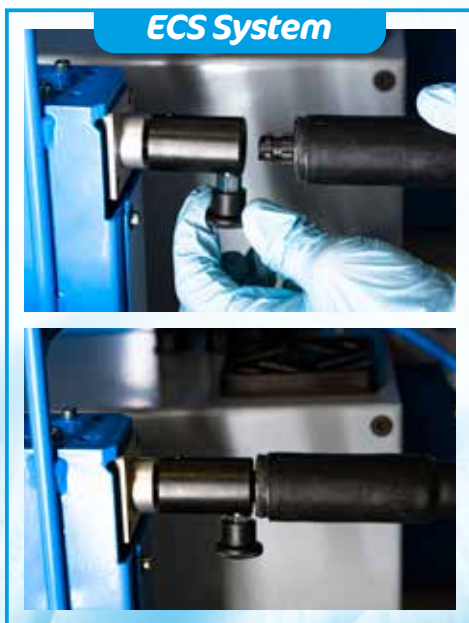

## ECS System (Easy Change Shaft)

Thanks to a specific insertion, you can replace the cable as needed.

The brush cables available are:

- 10 mm length 20 meters for pipes 250 to 600 mm STANDARD CABLE with which the machine is supplied
- 12 mm length 20 meters RIGID and reinforced for cleaning with big/aggressive brushes
- Cable replacement is very simple in about 10 minutes. Fast connection gear.

With **SPIRAL 20** it is possible to automate the brush rotation (brushing / rotation time clockwise/counterclockwise).

Various types of brushes with different materials and stiffness can be used with **SPIRAL 20**.

Ask us how to choose right bristles brushes and right dimensions for a better productivity.

**ALL-ROUND AND POWERFUL**

**TECHNICAL DATA**

<b>Operating Voltage</b>	240 V
<b>Frequency</b>	50 Hz
